YOUR DOCTOR PRESCRIBED ENTYVIO. SO, WHAT’S NEXT?

Please see Important Safety Information on pages 8, 9, and 10.
Filling your prescription for ENTYVIO may be a little different than what you are used to.

You can’t simply pick up ENTYVIO from your regular pharmacy because it’s a specialty medication known as a biologic.

Before you get started on your treatment, there are a few steps to complete. Read on to understand what to expect over the next few weeks, and what you can do while you wait.

Safety Considerations
Do not receive ENTYVIO if you have had an allergic reaction to ENTYVIO or any of its ingredients. Infusion-related and serious allergic reactions can happen while you are receiving ENTYVIO or several hours after treatment. ENTYVIO may increase your risk of getting a serious infection.

Please see Important Safety Information on pages 8, 9, and 10.
1 AUTHORIZATION

First, you need to be approved for coverage

To start, your health insurance provider must approve your coverage for ENTYVIO. This typically involves 2 steps.

• Benefits Verification Your doctor’s office will work with your insurance company to determine if ENTYVIO can be covered under your benefit plan.

• Prior Authorization Your doctor’s office will submit a request to your health insurance company to get approval for you to start treatment with ENTYVIO.

Keep in mind that the authorization process may take several weeks. Your doctor’s office will be in touch if they need additional information.

Safety Considerations

Do not receive ENTYVIO if you have had an allergic reaction to ENTYVIO or any of its ingredients. Infusion-related and serious allergic reactions can happen while you are receiving ENTYVIO or several hours after treatment. ENTYVIO may increase your risk of getting a serious infection.

Please see Important Safety Information on pages 8, 9, and 10.

2 SUPPORT

After you have been prescribed ENTYVIO, sign up for support

EntyvioConnect offers resources that can be tailored to provide the kind of help you need including:

- Personalized Guidance Our Nurse Educators provide one-on-one guidance, resources, and reassurance to help you get started and stay on treatment. They cannot, however, provide medical advice.

- Financial and Insurance Help If you need additional guidance, our co-pay and other financial resources may help you save on your out-of-pocket costs. Our experts can help navigate your insurance coverage and any eligibility requirements.

- Ongoing Support You’ll have access to helpful resources such as medication reminders and educational information to help you along the way.

To get connected, call 1-844-ENTYVIO (1-844-368-9846) or sign up at ENTYVIO.com/connect.
ENTYVIO is administered by a healthcare provider via an intravenous (IV) infusion (a needle inserted into a vein in your arm). If treatment with ENTYVIO is approved, your doctor’s office will help you choose the time and location for your first IV infusion. Depending on your coverage, you may receive an infusion at your doctor’s office, an infusion center, a hospital, or your home.

Your doctor will monitor you during and after the infusion for side effects to see if you have a reaction to the treatment.

Get to your appointment early, and bring your insurance information and co-pay.

Safety Considerations
Do not receive ENTYVIO if you have had an allergic reaction to ENTYVIO or any of its ingredients. Infusion-related and serious allergic reactions can happen while you are receiving ENTYVIO or several hours after treatment. ENTYVIO may increase your risk of getting a serious infection.

Please see Important Safety Information on pages 8, 9, and 10.
Do not receive ENTYVIO if you have had an allergic reaction to ENTYVIO or any of its ingredients.

ENTYVIO may cause serious side effects, including:

- Infusion-related and serious allergic reactions can happen while you are receiving ENTYVIO or several hours after treatment. You may need treatment if you have an allergic reaction. Tell your healthcare provider or get immediate medical help if you get any of these symptoms during or after an infusion of ENTYVIO: rash, itching, swelling of your lips, tongue, throat or face, shortness of breath or trouble breathing, wheezing, dizziness, feeling hot, or palpitations (feel like your heart is racing).

- ENTYVIO may increase your risk of getting a serious infection. Before receiving and during treatment with ENTYVIO, tell your healthcare provider if you think you have an infection or symptoms of an infection, such as fever, chills, muscle aches, cough, shortness of breath,

runny nose, sore throat, red or painful skin or sores on your body, tiredness, or pain during urination.

- People with weakened immune systems can get progressive multifocal leukoencephalopathy (PML) (a rare, serious brain infection caused by a virus). Although unlikely while receiving ENTYVIO, a risk of PML cannot be ruled out. PML can result in death or severe disability. There is no known treatment, prevention, or cure for PML. Tell your healthcare provider right away if you have any of the following symptoms: confusion or problems thinking, loss of balance, change in the way you walk or talk, decreased strength or weakness on one side of the body, blurred vision, or loss of vision.

- Liver problems can happen in people who receive ENTYVIO. Tell your healthcare provider right away if you have any of the following symptoms: tiredness, loss of appetite, pain on the right side of your abdomen, dark urine, or yellowing of the skin and eyes (jaundice).
The most common side effects of ENTYVIO include common cold, headache, joint pain, nausea, fever, infections of the nose and throat, tiredness, cough, bronchitis, flu, back pain, rash, itching, sinus infection, throat pain, and pain in extremities. These are not all the possible side effects of ENTYVIO. Call your healthcare provider for medical advice about side effects.

Before receiving ENTYVIO, tell your healthcare provider about all of your medical conditions, including if you: have or think you may have an infection or have infections that keep coming back; have liver problems; have tuberculosis (TB) or have been in close contact with someone with TB; have recently received or are scheduled to receive a vaccine; or if you are pregnant, breastfeeding, plan to become pregnant, or plan to breastfeed.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

ENTYVIO is a prescription medicine used in adults for the treatment of:

• moderately to severely active ulcerative colitis
• moderately to severely active Crohn’s disease

Please see full Prescribing Information, including the Medication Guide for ENTYVIO and talk with your healthcare provider.
